

Where the Conversion Leaks Are

voicenotes.com · CRO Recommendations · August 2026

The pricing page's competing CTAs and the homepage's unsubstantiated social proof and security claims are the primary leaks, diluting the self-serve conversion path and undermining trust. The most valuable mechanism is the self-serve signup flow, which is being bled by multiple equally prominent CTAs on the pricing page and homepage, and by trust signals that are claimed but not evidenced.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Homepage CTA clutter Homepage offers multiple competing CTAs, diluting the primary signup path.	High	Medium	5/10
2	Misleading 'Download' menu label Footer groups Enterprise and Pricing under 'Download', mislabeling their destinations.	Medium	Low	5/10
3	Competing CTAs on pricing Multiple equally prominent CTAs on the pricing page dilute the primary action, confusing self-serve buyers.	Urgent	Medium	4/10
4	Unsubstantiated security claim The security promise lacks visible certifications or details, reducing trust.	High	Medium	4/10
5	Missing trust signals above fold The homepage shows no sign of returns policy, guarantee, so a first-time visitor has nothing to offset...	High	Medium	4/10
6	Lack of risk reversal on pricing Pricing page offers no guarantee or refund statement near decision points, increasing perceived risk.	Medium	Medium	4/10
7	Per-user prices lack billing period Paid tiers show per-user prices without specifying monthly or annual billing, causing confusion.	Medium	Medium	4/10
8	Enterprise email gate before value Enterprise page leads with a business email capture, blocking access to pricing and product details.	High	Medium	3/10
9	Unsubstantiated social proof claim The homepage claims real customer results without providing logos or quotes to back it up.	High	Low	3/10

#	Finding	Severity	Effort	PXL
10	Enterprise link lands on email gate The 'Enterprise' nav label promises an overview but lands on an email capture form, mismatching expectations.	Medium	Low	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
